Step 1: Select the "Gradient Tool".

Step 2: Right-click on the image and choose the kind of brush to be used.

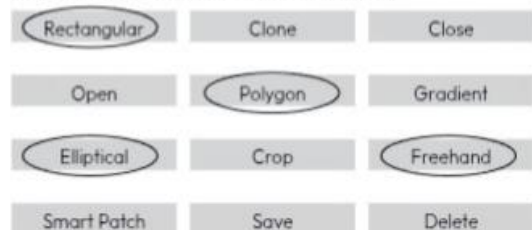

Step 3: Click and drag on the canvas to define the gradient direction and length.

Step 4: Release the mouse button to apply the gradient fill, creating a smooth colour transition.

E. Competency-Based Questions.

1. Crop tool
2. She can use the clone tool. To use the clone tool, she needs to select the clone tool from the brush presets and hold the CTRL key and click on the area to be cloned, and then she drags the mouse on the area where she needs to create the clone. The clone object will be created.

F. Circle the selection tools of Krita.

Class 8

Answer Key

Tune-Up

1. Smart patch tool
2. Freehand selection tool
3. Crop tool
4. Polygon selection tool

DIY

1. Onion Skin and Frames
2. Timeline

Assess Your Skills

A. Multiple Choice Questions.

1. b) Transparent stacked sheets
2. b) Vector
3. a) Organise
4. c) Hide
5. d) Onion Skinning

B. Write T for True and F for False.

- | | | |
|------|------|------|
| 1. T | 2. F | 3. F |
| 4. T | 5. F | |

C. Match the following.

- | | | |
|-----|-----|-----|
| 1—d | 2—c | 3—e |
| 4—a | 5—b | |

D. Answer the following questions.

1. Frames are the individual images that, when played in sequence, create the illusion of movement in an animation. Keyframes, on the other hand, are crucial frames that define significant points in the animation's timeline, such as the start and end positions of a movement.
2. To hide/show a layer, click on the open-eye-shape icon to show a hidden layer and click on the closed-eye-shape icon to hide a layer.
3. To delete a layer, select the layer which you want to delete and click on the "Delete the layer or mask" button.
4. To add a frame, follow the given steps:
Step 1: Click on the Animation Timeline docker.
Step 2: Click on the Add Blank Frame button.

5. Timeline displays all the frames of the animation in a sequence. It helps to add, delete, and manage frames.

6. To open the animation workspace, follow the given steps:

Step 1: On the right top corner of the screen, click on the "Choose Workspace" button.

A drop-down menu will appear.

Step 2: Click on "Animation" option.

7. To create an animation, follow the given steps:

Step 1: In the animation timeline, create a blank frame at frame 0.

Step 2: Go to Ellipse tool and draw a ball at any location in the centre of the drawing.

Step 3: Click on frame 10 and create a new blank frame.

The ball will disappear, creating a blank frame. We need to create another ball which is at the ground position in this frame.

Step 4: Go to the layer and click on the small bulb icon, and it will show a shadow of your previous frame (original position of the ball).

This will help you in deciding where to draw the next ball.

Step 5: Draw the next ball near the ground.

Step 6: Now, come to frame 20 and create the ball at its original position.

Step 7: Click on the Play button to play the animation.

E. Competency-Based Questions.

1. To duplicate a layer, he needs to follow the given steps:
Step 1: Click on the layer which he wants to duplicate.
Step 2: Click on the Duplicate layer button from the Docker.
2. Playback Controls
