

Quiz 2

Grade: 7

Subject: **Computer Science**

Total Marks: **12.0**

Total Time: **15 minutes**

Instructions:

Based on chapter 2

1. Which symbol is used for multiplication in Excel formulas? 1 (0)
 - a. *
 - b. /
 - c. —
 - d. +

2. What is the function to calculate the sum of a range? 1 (0)
 - a. AVERAGE
 - b. SUM
 - c. MIN
 - d. MAX

3. What does the error #DIV/0! indicate? 1 (0)
 - a. Text error
 - b. Division by zero
 - c. Cell reference error
 - d. Function name error

4. How do you define a range from A1 to B3? 1 (0)
 - a. A1,B3
 - b. A1-B3
 - c. A1:B3
 - d. A1.B3

5. Which function returns the current date and time? **1 (0)**
- a. TODAY()
 - b. DATE()
 - c. TIME()
 - d. NOW()
6. Which reference type remains constant when copied to another cell? **1 (0)**
- a. Relative
 - b. Absolute
 - c. Mixed
 - d. None of these
7. All Excel formulas must start with an equal sign. **1 (0)**
- a. TRUE
 - b. FALSE
8. The cell reference = \$A1+B\$2 is an example of a relative reference. **1 (0)**
- a. TRUE
 - b. FALSE
9. The POWER function is used to calculate the product of a range. **1 (0)**
- a. TRUE
 - b. FALSE
10. The error #REF! indicates an invalid cell reference. **1 (0)**
- a. TRUE
 - b. FALSE
11. Mixed references combine relative and absolute references. **1 (0)**
- a. TRUE
 - b. FALSE
12. Functions are predefined formulas that perform calculations. **1 (0)**
- a. TRUE
 - b. FALSE
