

ASSESS YOUR SKILLS - ANSWER KEY

Microsoft Word Features & Page Setup • Class 5 Computer Studies

A. MULTIPLE CHOICE QUESTIONS

1. What are page margins in Microsoft Word?

Answer: **a.** Area between the page (The blank space between the text and the edges of the page)

2. How can you change the page orientation for the whole document in Microsoft Word?

Answer: **a.** Using Layout tab

3. What does indentation refer to in Microsoft Word?

Answer: **d.** Space (The distance or blank space between the text margins and the paragraph text)

4. Which of the following is used to align the text?

Answer: **b.** Tabs

5. How can you insert a header or footer in Microsoft Word?

Answer: **a.** Using Insert tab

B. WRITE T FOR TRUE AND F FOR FALSE

1. Page settings primarily affect the appearance of the document when viewed on a computer screen.

Answer: **F** (False — Page settings primarily affect how the layout looks when printed on paper)

2. Page margins control the amount of space between the text and the edges of the page.

Answer: **T** (True)

3. Custom margins cannot be set in Microsoft Word.

Answer: **F** (False — Users can easily customize margins manually by setting specific top, bottom, left, and right dimensions)

4. Page orientation in Word refers to the style of writing used in the document.

Answer: **F** (False — Page orientation refers to whether the page is displayed vertically as Portrait or horizontally as Landscape)

5. In landscape orientation, the width of the page is greater than its length.

Answer: **T** (True)

C. ANSWER THE FOLLOWING IN ONE OR TWO WORDS

1. What type of orientation has length of the page greater than its width?

Answer: **Portrait orientation**

2. What feature in Word allows you to organise text into multiple vertical sections?

Answer: **Columns**

3. What is the space between the edge of a paragraph and the beginning of its text called?

Answer: **Indentation**

D. ANSWER THE FOLLOWING QUESTIONS

1. What is the purpose of tabs in Word?

Answer: Tabs are used to control the placement of text and align it precisely at specific horizontal intervals on a page. Pressing the Tab key moves the cursor to preset stop points, which helps create neatly formatted lists, tables, or indented text without using repetitive spaces.

2. What is mail merge?

Answer: Mail Merge is a powerful feature in Microsoft Word that allows users to create personalized documents (such as letters, certificates, envelopes, or emails) for a large group of people at once. It combines a single main document template with a data source list containing recipient details like names and addresses.

3. What are page settings? How do they help in Microsoft Word?

Answer: Page settings are layout configurations that define how pages are structured and presented. They include adjustments for paper margins, orientation (portrait/landscape), paper size, and columns. They help in Microsoft Word by ensuring documents look organized, visually professional, and correctly formatted for reading or printing.

4. How can you change the page orientation in Word?

Answer: To change the page orientation, follow these steps:

- Click on the **Layout** tab on the Ribbon.
- In the Page Setup group, click on the **Orientation** command dropdown.
- Select either **Portrait** (vertical) or **Landscape** (horizontal) according to your requirement.

5. Describe the process of setting up columns in Word.

Answer: To split your text into vertical columns, follow these steps:

- Select the text you want to format into columns (or place your cursor where you want columns to start).
- Go to the **Layout** tab on the Ribbon.
- Click on the **Columns** button in the Page Setup group.
- Choose your preferred configuration from the dropdown list (such as *One*, *Two*, *Three*, *Left*, or *Right*), or click on *More Columns...* for custom sizes.

E. COMPETENCY-BASED QUESTIONS

1. Dhriti is working on a Word document and wants to insert a header. However, she has forgotten the process. Help her by writing the steps.

Answer: Dhriti can insert a header by following these easy steps:

- Click on the **Insert** tab on the Ribbon.
- Look for the Header & Footer group and click on the **Header** option button.
- Select a built-in header design style from the dropdown menu.
- Type the desired text in the header area. When finished, double-click anywhere in the main body text area or click the **Close Header and Footer** button to return to editing the document.

2. Your classmate Divyansh needs to create multiple personalised documents for a school project. Help him by writing the command and the tab to use to perform the same.

Answer: To create multiple personalized documents efficiently, Divyansh should use the following:

- **Tab to use:** Mailings tab
- **Command to use:** Start Mail Merge (or the Step-by-Step Mail Merge Wizard)
