

1. What is the purpose of a chart title in an Excel chart?

A chart title describes what the chart is about and helps users understand the data being presented.

2. What is conditional formatting in Excel?

Conditional formatting is a feature that automatically changes the appearance of cells (like color, font, or icons) based on specific conditions or rules.

3. Define cell styles.

Cell styles are predefined formatting options (such as font, color, borders) that can be applied to cells to make data look consistent and clear.

4. What is the difference between a bar chart and a column chart?

Bar chart: Uses horizontal bars to represent data

Column chart: Uses vertical bars to represent data

5. How can a legend be useful in understanding a chart?

A legend explains the meaning of colors, symbols, or patterns used in the chart, making it easier to interpret the data.

6. Write steps to insert a picture in Excel.

Click on the Insert tab

Select Pictures

Choose the image source (This Device/Online)

Select the picture

Click Insert

7. Write steps to change a chart type in Excel.
