

Class 7

Multiple Choice Questions.

1x6 = 6

1. How many unique digits are used in the binary number system?
 - a) 2
 - c) 10
 - b) 8
 - d) 16
2. How do you define a range from A1 to B3?
 - a) A1,B3
 - b) A1-B3
 - c) A1:B3
 - d) A1.B3
3. What is the decimal equivalent of the binary number 1011?
 - a) 9
 - b) 10
 - c) 11
 - d) 12
4. Which function returns the current date and time?
 - a) TODAY()
 - b) DATE()
 - c) TIME()
 - d) NOW()
5. Which digit does 'A' represent in the hexadecimal number system?
 - a) 9
 - b) 10
 - c) 11
 - d) 12
6. Which reference type remains constant when copied to another cell?
 - a) Relative
 - b) Absolute
 - c) Mixed
 - d) None of these

Fill in the blanks using the words given below.

1x6 = 6

1. operators are used to perform basic mathematical operations.
2. In Excel, a cell address is known as a
3. To toggle between relative and absolute references, press the key.
4. function returns the current date.
5. functions are used to perform statistical analyses.
6. $1010 + 1101 = \dots\dots\dots$

Write T for True and F for False.

1x6 = 6

1. Hexadecimal numbers include the digits 0-9 and the letters A-F.
2. The cell reference = \$A1 + B\$2 is an example of a relative reference.
3. In binary addition, 1+1 equals 2.
4. The error #REF! indicates an invalid cell reference.
5. The number 1101 in binary is equal to 16 in decimal.
6. Mixed references combine relative and absolute reference.

Match the following.

1x6 = 6

- | | |
|----------------|-------------|
| 1. Decimal | a. Base-2 |
| 2. Binary | b. Base-16 |
| 3. Bit | c. Base-10 |
| 4. Octal | d. Base-8 |
| 5. Hexadecimal | e. Inverter |
| 6. NOT | f. 0 and 1 |

Answer the following in one or two words.

1x6 = 6

1. Name any one type of statistical function.

2. Which function reverses the logical value?
3. Which function is used to count the number of cells that contain numbers?
4. Solve $1110 - 1011$
5. How many digits are used in the binary number system?
6. $0 - 1 = 1$ with borrow = ?

Very Short Questions.

2x3 = 6

1. What is a number system?
2. What is a logical function?
3. What is the purpose of the MOD function?

Short Questions.

3x2 = 6

1. What are MSB and LSB? Explain with an example.
2. When does the error #VALUE! occur?

Long Questions.

4x2 = 8

1. What is the cell range? How to define a cell range in Excel?
2. What steps are involved in converting an octal number to a decimal? Convert the octal number 346 to decimal.

END
