

please provide answer of all the questions

Here are the answers for Periodic Assessment 1 (Chapters 1 & 2):

A. Identify the given icons and write their uses

- New Slide / Slide Layout icon**
➤ Used to insert a new slide or choose a slide layout in a presentation.
- Highlighter / Marker tool**
➤ Used to highlight important text or content.
- Speaker / Audio icon**
➤ Used to play or adjust sound/audio in a presentation.
- Timer / Clock icon (Rehearse Timings)**
➤ Used to record or set timing for slides during a slideshow.

B. Number the steps in correct order

(Correct sequence)

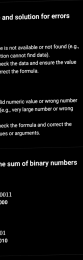

- Select the column header 'C'.
- Click 'Data' tab → 'Data Validation' option in the 'Data Tools' group.
- Select 'Whole number' in the 'Allow' dropdown menu.
- Select 'between' in the 'Data' dropdown menu.
- Enter 30 in the 'Minimum' field.
- Enter 40 in the 'Maximum' field.
- Click 'OK'.

C. Define the following

- Record Slide Show**
➤ It is a feature used to record slide timings, navigation, and animations for a presentation.
- Filtering**
➤ Filtering is the process of displaying only selected data that meets certain conditions while hiding the rest.
- Error Alert**
➤ Error Alert is a message that appears when invalid data is entered in a cell, according to set validation rules.

If you want, I can also ➤ translate these answers into Hindi or ➤ explain them in simple language for students 🙌

please provide answers

Here are the correct answers:

A. Match the following

- $(10101101)_2 \rightarrow$ b. Binary
- $(2002)_{10} \rightarrow$ d. Decimal
- $(AC7)_{16} \rightarrow$ a. Hexadecimal
- $(104)_8 \rightarrow$ c. Octal

B. Fill in the blanks

- Arithmetic operators are used to perform basic mathematical operations.
- In Excel, cell address is known as a cell reference.
- To toggle between relative and absolute references, press the F4 key.
- TODAY() function returns the current date.
- Statistical functions are used to perform statistical analyses.

C. Cause and solution for errors

- #N/A**
Cause: Value is not available or not found (e.g., lookup function cannot find data).
Solution: Check the data and ensure the value exists or correct the formula.
- #NUM!**
Cause: Invalid numeric value or wrong number calculation (e.g., very large number or wrong argument).
Solution: Check the formula and correct the numeric values or arguments.

D. Find the sum of binary numbers

- $10101 + 00011$
Answer: 11000
- $1101 + 1101$
Answer: 11010

E. Find the difference of binary numbers

- $10011 - 01010$
Answer: 01001
- $1111 - 1100$
Answer: 0011

If you want, I can also ➤ show step-by-step binary addition and subtraction rules (very useful for exams) 🙌

please provide answers

Here are the correct answers:

A. Identify the components of a network and write their uses

- Network Interface Card (NIC)**
➤ It is used to connect a computer to a network and allows it to communicate with other devices.
- Switch**
➤ It connects multiple devices in a network and sends data to the correct device.
- Router (Wireless Router)**
➤ It connects different networks and provides Internet access (also supports Wi-Fi).

B. Label the components of chart

From the given chart:

- Top (center) → Chart Title (Sales)
- Top right arrow (pointing inside chart) → Plot Area
- Right side arrow (pointing to bars) → Data Series
- Left side arrow (numbers like 0-12000) → Value Axis (Y-axis)
- Bottom left arrow (Jan, Feb, etc.) → Category Axis (X-axis)
- Bottom center arrow (Sales 1, Sales 2, Sales 3) → Legend

If you want, I can also ➤ explain each chart component in simple Hindi + English for teaching purpose 🙌
